

PACKAGING, DISPOSABLES & HYGIENE

Welcome to AIV

Australia Independent Vendors (AIV) is a network of franchised vendors operating within the foodservice and route markets throughout metropolitan and regional Australia. AIV offers a range of 56,000 products to foodservice providers across various categories including packaging, disposables and hygiene.

Our Packaging, Disposables & Hygiene Catalogue represents an extensive core range of products designed for the foodservice industry. Our range incorporates food wraps & bags, drinkware & accessories, containers, hygiene products, protective wear, cleaners & wipes, cleaning detergents, tableware, and stationery.

AIV boasts a dedicated and experienced team, devoted to understanding the needs of you, our customer.

How To Order

AIV DIRECT

AIV Direct is our online ordering facility available exclusively to AIV customers. Ordering online at aivdirect.com.au is quick, easy, and user friendly. View products, place selected goods in your basket and click "Submit". We then deliver your goods to your door.

EMAIL

To place an email order, simply email your selection from this catalogue to your local vendor, along with your account details and delivery address. We will do the rest.

PHONE

For those who prefer the personal touch, give your local vendor a call and place your order.

FAX

You can easily place your order via fax. Make your selection from this catalogue, and fax it to your local vendor with your account details and delivery address. It's that easy!

Environmental

FSC® (Forest Stewardship Council®)

FSC® certification is recognised throughout the world as having the most rigorous environmental and social standards for responsible forest management. FSC® chain of custody is independently certified and assessed every step of the process – from forestry, harvesting and pulping to paper and tissue production.

PEFC™ (Programme for the Endorsement of Forest Certification schemes™)

PEFC™ assures the buyer of wood and paper products that they are supporting the sustainable management of forests. PEFC™ is an international, non-profit, non-governmental organization which promotes sustainable forest management through independent third party certification.

EU Ecolabel (EU label)

Products with the EU Ecolabel have a lower environmental impact on air, water, soil and human health throughout its life cycle, from raw material extraction to end-of-life. It guarantees technical performance and often presents the added value advantage of lower than average costs.

CFC - chlorofluorocarbon

A fluorocarbon with chlorine; formerly used as a refrigerant and as a propellant in aerosol cans; "the chlorine in CFCs causes depletion of atmospheric ozone".

HCFC - hydrochlorofluorocarbon

A fluorocarbon that is replacing chlorofluorocarbon as a refrigerant and propellant in aerosol cans; considered to be somewhat less destructive to the atmosphere.

Plastic ID Codes

These recycling symbols indicate the plastic identification. It's a global system to help identify what type of plastic the product is made from, its properties and how it becomes a re-usable product by recycling.

Symbol	Type of plastic	Properties	Common uses	Recycled in
	PET Polyethylene Terephthalate	Clear, tough, solvent resistant, barrier to gas and moisture, softens at 70°C	Soft drink and water bottles, salad domes, biscuit trays, salad dressing and peanut butter containers	Pillow and sleeping bag filling, clothing, soft drink bottles, carpet
	APET	Clear, tough, solvent resistant, barrier to gas and moisture, softens at 70°C	Soft drink and water bottles, salad domes, biscuit trays, salad dressing and peanut butter containers	Pillow and sleeping bag filling, clothing, soft drink bottles, carpet
	HDPE High Density Polyethylene	Hard to semi-flexible, resistant to chemicals and moisture, waxy surface, opaque, softens at 135°C, easily coloured, processed and formed	Crinkly shopping bags, freezer bags, milk bottles, ice cream containers, juice bottles, shampoo, chemical and detergent bottles, milk crates	Recycling bins, compost bins, buckets, detergent containers, posts, fencing, pipes
	PVC-U Unplasticised Polyvinyl Chloride PVC-P Plasticised Polyvinyl Chloride	Strong, tough, can be clear, can be solvent welded, softens at 75°C Flexible, clear, elastic, can be solvent welded	Cosmetic containers, electrical conduit, plumbing pipes and fittings, blister packs, wall cladding, roof sheeting, bottles Garden hose, shoe soles, cable sheathing, blood bags and tubing, watch straps, commercial cling wrap	Flooring, film and sheets, cables, speed bumps, packaging, binders, mud flaps and mats
	LDPE Low density Polyethylene LLDPE Linear low density Polyethylene	Soft, flexible, waxy surface, translucent, softens at 80°C, scratches easily	Cling wrap, rubbish bags, squeeze bottles, black irrigation tube, black mulch, film, rubbish bins, shrink wrap	Rubbish bin liners, pallet sheets, slip sheets
	PP Polypropylene	Hard but still flexible, waxy surface, softens at 145°C, translucent, withstands solvents, versatile	Dip pottles and ice cream tubs, potato chip bags, straws, microwave dishes, kettles, garden furniture, lunch boxes, blue packing tape, automotive parts	Pegs, bins, pipes, pallet sheets, oil funnels, car battery cases, trays
	PS Polystyrene	Clear, glassy, rigid, brittle, opaque, semi-tough, softens at 95°C. Affected by fats and solvents	CD cases, plastic cutlery, imitation 'crystal glassware', low cost brittle toys, video cases, water station cup, safety helmets	Coat hangers, coasters, white ware components, stationery trays and accessories
	EPS Expanded Polystyrene	Foamed, light weight, energy absorbing, heat insulating	Foamed polystyrene hot drink cups, hamburger take-away clamshells, foamed meat trays, protective packaging for fragile items, insulation, insulation panels	Car parts, concrete aggregate, plastic timber
	PC (polycarbonate), Nylon, degradable plastic e.g. PLA	Includes all other resins, multi materials (e.g. laminates) and degradable plastics. Properties dependent on plastic or combination of plastics	Packaging, car parts, appliance parts, computers, electronics, water cooler bottles, medical devices	Car parts, concrete aggregate, plastic timber
	OTHER SAN (styrene, acrylonitrile), ABS (Acrylonitrile butadiene styrene)	Includes all other resins, multi materials (e.g. laminates) and degradable plastics. Properties dependent on plastic or combination of plastics	Packaging, car parts, appliance parts, computers, electronics, water cooler bottles, medical devices	Car parts, concrete aggregate, plastic timber

4 GREAT REASONS TO CHOOSE CASTAWAY® COFFEE CUPS AND LIDS

LIDS: Ongoing biodegradation measured to ASTM D5511 standards*

One lid fits all 8oz, 12oz and 16oz cups

Australian made in HACCP accredited facilities

Paper sourced from sustainably managed plantation forests

Double Wall Insulcups®

Single Wall Hot Cups

DIMPLE® Hot Cups

eco-smart Coffee Cup Lids

*Eco-Smart® polystyrene lids, bowls and plates have been shown to biodegrade 24% after 216 days, under conditions that simulate a wetter biologically active landfill, using the ASTM D5511 standard test. Note that a stated rate of degradation does not mean the product will continue to decompose. Testing continues on all Eco-Smart® products to track the rate of biodegradation. All data will be made available on our website: www.castawayfoodpackaging.com.au

DRINKWARE & ACCESSORIES

eco-smart® clear plastic cups

Eco-Smart® plastic cups are an environmentally conscious range, providing economical and convenient solutions for water coolers and alcohol service.

To find out more, visit: www.mppmarketing.com.au

Ongoing biodegradation measured to ASTM D5511 standards*

Strong, durable, crack-resistant

Recyclable P.P.

Australian Made, HACCP Accredited

Eco-Smart™ beer cups are Weights and Measures approved for alcohol service

HiKleer® high clarity, high performance

Designed for exceptional clarity, portion control and recyclability. HiKleer® cups are ideal for blended drinks, gourmet frozen beverages, yoghurt parfaits, and alcoholic beverages.

High clarity for a premium look

Strong, durable, crack-resistant

Leakproof lids

Wide range of sizes available

Recyclable P.E.T.

*Eco-Smart® polypropylene cups have been shown to biodegrade 10.8% after 164 days, under conditions that simulate a wetter biologically active landfill, using the ASTM D5511 standard test. Note that a stated rate of degradation does not mean the product will continue to decompose. Testing continues on all Eco-Smart® products to track the rate of biodegradation. All data will be made available on our website: www.castawayfoodpackaging.com.au

The double base design of our cups has one of the highest leak reduction rates in the market, being under 1 in a million, but most importantly it keeps your hot drink for longer. Both Caterers Choice corrugated and triple wall cups use triple wall technology. This combined with built in air bubble design helps reduce heat transference and improves heat insulation for safe holding. Our simple "one-lid-fits-all" design has led the way for many other companies, reducing inventory and confusion created by multiple required lids, not to mention reducing "tidy up time" for our customers

Biopak Biocups are produced from heavy-duty board for a premium quality product with superior stability, lid fit and insulation and are printed using soy or water based inks. All of Biopak's paper is sourced responsibly from managed plantations and coated with Ingeo, an innovative corn-based bioplastic rather than conventional petroleum-based plastic.

TOGETHER WE CAN MAKE A DIFFERENCE

BioCups are made from paper from managed plantations with a bioplastic waterproof lining made from plants not oil.

New 8oz Uni-Lid BioCup

- ☑ Reduce your inventory and improve efficiency with one lid solution

BioPak have designed a new 8oz uni-lid cup that fits the standard 12oz large lids. Now you can order one lid to fit your 8oz, 12oz and 16oz cups. Available in single and double wall, in kraft, BioPak leaf and plain white.

New Indigenous BioCups

- ☑ Help spread the word about supplier diversity and open your doors to Indigenous business and communities

BioPak, in partnership with CorporateConnect.AB (CCAB) and Supply Nation, now offer a paper coffee cup featuring an Indigenous art design and educational message – perfect for starting conversations over your cup of coffee. Purchasing this product will directly support the work of CCAB, Aboriginal communities and help you achieve your supplier diversity purchasing goals.

BioPak
It doesn't cost the earth

Vertical Flange, Interrupted Curl

①

Hemmed Edge

②

③

④

Rolled edge provides additional strength and safety to the container • The vertical flange provides straight, strong edges that make the container suitable for use with a lid • The interrupted curl allows the corners of the container to be folded securely, locking the lid in place • The hemmed edge is where the lip of the container folds out back onto itself to help protect the user from sharp edges

Takeaway Cardboard Food Pails - CASTAWAY®

Castaway® cardboard food pails uniquely sealed sides, combined with a double poly inner board lining, hold contents drip-free and secure the leak proof qualities make this product perfect for takeaway foods and moist meals.

TREE FREE CONTAINERS MADE FROM SUGARCANE PULP

- 🌱 Sugarcane is a fast growing and annually renewable plant-based raw materials and is one of the world's most abundant crops.
- 🌱 Bagasse requires less energy to produce and has a smaller carbon footprint than plastic.
- 🌱 Bagasse is a denser fibre than wood pulp, producing the same amount of product with less raw material, water, energy and waste.
- 🌱 Bagasse will biodegrade within 120 days in a commercial compost facility. It will biodegrade in 180 days in soil.
- 🌱 All BioPak products are carbon neutral.

BioPak is committed to contributing towards a new era that inspires consumers to think about stewardship, frugality and responsible choices. Our business and product provides consumers with an educated, certified and accountable sustainable option to conventional fossil fuel based packaging.

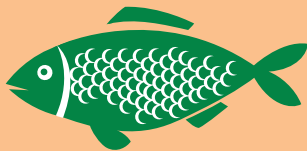

PLASTIC FACTS

Conventional plastics are made from finite fossil resources. 4% of the global oil consumption is used as a feedstock for plastics and an additional 4% is used as energy for the production process.

Australians generated more than 3 million tons of plastic waste in 2014 and only 26% of all the plastic waste generated in 2014 was recovered for recycling. Between 10% and 14% of the total waste in landfill consists of discarded plastic.

ENVIRONMENTAL IMPACT OF PLASTICS

Plastic that ends up in the environment is a problem. 100,000 marine creatures die from plastic entanglement each year.

An estimated 460,000 pieces of plastic occupy each square mile of ocean. At least 2/3 of the world's fish stocks ingest plastics.

More than 250 species are known to have eaten or become tangled in plastic.

Plastic takes hundreds of years to completely break down.

Alternative Materials

Paper. All our paper is sourced from managed plantations. Paper cups are coated with a plant based bioplastic and are recyclable and compostable.

Bagass. The pulp leftover after the juice is extracted from sugarcane. Compostable, rapidly renewable and biodegradable.

Bioplastics. Our bioplastics are made from plant starches. The production of bioplastics emit up to 75% less greenhouse gas compared to conventional plastic.

All CO2 emissions associated with the production, distribution and disposal of our products are offset through the purchase of carbon credits.

Castaway® Elegance® napkins are the first choice for restaurants and fine dining establishments. Elegance® napkins are double the thickness of standard 2ply napkins and have superior durability, softness and absorbency. Embossing across the whole surface prevents ply separation for a stronger napkin.

Chafer Fuel - EASY HEATERS

100% Australian made. Safe. Easy to use. No unpleasant smells. Easy Heaters are 100% designed, manufactured, and made in Australia. Many years of practical and technical experience in the Australian food industry have been applied to producing a product that is very reliable, and safe to handle and store. In addition, with their simple opening system and non-spill container Easy-Heaters are very easy to use. Clean burning, non-toxic fuel keeps your food and beverages hot while emitting no unpleasant smells. With Easy Heaters you can be sure that food enjoyment is always the priority.

Code	Description	Unit	Ctn Qty	Image
109149	Liquid Fuel 6 Hours	CTN	24	

Containers and liquid content of Easy Heaters are all made from the most stringent quality control criteria. The wind resistant flame bowl keeps your food and beverages hot even in windy conditions. Container heights and diameters have been thoughtfully chosen to enable easy installation, as well as maximising the efficient warming potential of all the most popular heated buffet dishes.

Pure Diethylene Glycol • Braided wick • Easy open lids • Cool to the touch • Not classed as Hazardous Goods • 100% Australian made

Used by larger resorts and venues that have continuous buffets
